SECTION 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

DANGER! Vapor harmful. Overexposure may cause lung damage. May cause allergic skin reaction, effects may be permanent. Combustible liquid and vapor.

Potential Health Effects

Acute Effects (Short Term):

Eye: Can cause tearing, eye reddening, and swelling and other irritation.

Skin: Avoid contact with skin, may cause irritation, sensitization possible through skin contact.

Swallowing: harmful if swallowed.

Inhalation: High concentrations may irritate respiratory system, may cause sensitization.

Chronic Effects of Overexposure (Long Term): Polyisocyanate: as a result of previous exposure, certain individuals develop sensitization which will cause them to react to a later exposure to product at levels well before the TLV. Symptoms include chest tightness, wheezing, cough, shortness of breath or asthma attack. Effect could be immediate or delayed.
